

With an experience of over 21 years in the copper tube industry, Cannelle Holdings has to be able to manufacture its own range of copper pipes and fittings 'CLI' As a result of our prolific and loyal customer base, CLI has become a successful and known brand in the manufacture and distribution of copper tubes for, air conditioning, refrigeration, water supply and a variety of other commercial applications.

The reason for this speedy success is owing to the fact that we understand customer satisfaction is not only driven by innovative products but also efficiency in quality of services and products. Our employees take pride in ensuring we meet our customer needs and requirements: from timely deliveries to efficient sales and service departments, to utmost products quality.

Driven to Quality efficiency

CLI implements stringent testing methods and controls to ensure the highest quality of tubes reaches our customers. From acquiring raw materials to the final packaging; our tubes and fittings are tested at all stages of production and distribution until it reaches the final consumer. This ensures defects, if any, are immediately detected and dealt with.

Material

Type DHP (UNS C12200) Copper. This material meets the requirements of CLI Premium +.

Cleanliness and Appearance

As per the requirements of standard CLI Premium +, any residue on the inside of the tube will not exceed 0.0035 gm/ft² (0.038 g/m²) Both the inside and outside diameter surfaces will be clean and bright, with the finish being smooth and free from silvers, scale, open grain and major metal defects such as inclusions. Level wound coils with insignificant surface damage, such as minor dents that will not interfere with the tubing’s end use, will be shipped.

Product	Application	Temper	Standards
Refrigeration Tube	Air Conditioning Refrigeration Service	Soft Annealed	ASTM B 280 ASTM B 743
ACR L Tube (Degreased Cleaned & Capped)	Air Conditioning Refrigeration Natural Gas	Hard drawn	ASTM B 280 ASTM B 743 ASTM B 75
Tube TYPE L, TYPE K	Domestic Service, Fire Protection, Solar, Fuel Oil, HVAC and Natural Gas	Hard drawn	ASTM B 280 ASTM B 88

CLI copper tubes are manufactured as per CLI PREMIUM + Standards with highest precision and cleanliness needed for the demanding conditions of HVAC and refrigeration applications. Our products are purged with nitrogen to provide maximum protection against the formation of harmful oxides during brazing operations. CLI copper tubes are degreased, dehydrated and packed in eco – friendly individual cartons for the highest level of protection.

CLI ECO LITE Copper Coils are an excellent choice for HVAC and refrigeration systems, offering a balance of high efficiency, durability, and reduced weight. They are particularly well-suited for applications where both performance and ease of installation are important. For detailed specifications, installation guidelines, and pricing, contacting the manufacturer or supplier directly is recommended
